

650 nm/ 664 nm/ 690 nm/ 730 nm Visible Laser Module Data Sheet

AKELA's 650nm / 664nm / 690nm / 730nm fiber coupled laser diodes deliver an unmatched combination of output power, high-brightness and reliability from a single emitter. In addition to the pump package shown below, AKELA offers visible laser modules in two other standard packages, as well as custom visible fiber coupled laser diode packages with any fiber diameter or NA desired. Please contact us to discuss your specific requirements.

Device Specifications	Minimum	Typical	Maximum
CW Output Power, W		1.0	1.3
Spectral Width (FWHM), nm	<1	<1	<1
Threshold Current, A	0.42	0.45	0.50
Slope Efficiency, W/A	0.50	0.55	0.60
EO Efficiency, %		18	20
Operating Current, A		2.5	3.0
Operating Voltage, V	2.0	2.2	2.4

Fiber AFS 105/125Y NA=0.22

Specifications are subject to change without notice. In addition, AKELA can customize the laser design to meet different operating parameters. Please contact us for more details.

These components do not comply with the Federal Regulations (21 CFR Subchapter 1) as administered by the Center for Devices and Radiological health. Purchaser acknowledges that his/her products must comply with these regulations before they can be sold to a customer.
